COOKIES

Cookies (so-called "cookies") are computer data, especially text files that are stored in the terminal equipment of the Service User and are designed for use with Web Service. Cookies typically contain the name of the website from which the storage time on the final equipment and a unique number.

CBB uses cookie files to collect information related to your use of the Services by Users and does not collect any automated other information about the User. This action is not collecting or processing personal data. You can disable cookies by configuring your web browser settings used by User, however you might lose access to some of our features.

The services of CBB cookies are used to:
- adapt web content to the Service User preferences and optimizing the use of the websites, in particular, these files allow the user to identify the device and properly display the Service website, tailored to their individual needs;
- to create statistics that help to understand how users navigate through the service, to use the Service Members of the websites, which can improve the structure and content;
- the maintenance of the Service User sessions (after logging in), so the user does not have on every page of the Service re-enter login and password;

Can I opt out of accepting cookies?

Activities related to storing and sending cookies are supported by web browsers and are invisible to the user. Most used browsers accept cookies by default. However, you can set your browser to reject requests to store cookies at all or some cookies. This can be done using the settings in your browser. Before you decide to change the default settings, remember that a lot of Cookies help increase convenience of use. Disabling Cookies may have an impact on how we will view the page in your browser.
